SNEAD STANDARD STACK

A bookstack realizing all the principles of modern stack construction and offering every advantage to efficient library work.

WITH uprights of selected, grey iron castings, neatly moulded from well designed, clean cut patterns and sand blasted, ground and finished to obtain the best possible result. They extend the full width of shelves, supporting the latter at all four corners.

WITH shelves of the Snead Open Bar construction, quickly interchangeable at intervals of about one inch, which lock in place by gravity and have no end brackets or loose adjustment parts. Shelves cannot rattle, their flexibility insures support at all corners.

WITH a finish, on all fixed parts, of aluminum bronze or light-reflecting, air-drying enamel which may be renewed with the stack in place. And with a finish, on all movable parts, of black semi-gloss, rubber japan baked in ovens to give a smooth, hard and elastic covering.

WITH a compact design which gives a maximum book storage capacity, greater than any other form of standard stack.

WITH all parts of the stack incombustible.

WITH an open construction of uprights, shelves and deck floors which eliminates all hollow spaces and inaccessible dust collecting pockets which harbor vermin, and permits of thorough fumigation by germ destroying gases; a construction which permits of thorough heating and ventilation of the stack room.

SNEAD Standard Stack can be adapted to almost any purpose and always presents an appearance architecturally beautiful.

The Library of the Chamber of Commerce of the United States of America and its Relation to Foreign Trade

By D. A. Skinner, Assistant Secretary, Chamber of Commerce of the U. S.

Washington is the official center of commercial information from abroad. Records and current reports are more complete in Washington than anywhere else in the United States, by reason of the breadth of authority extending from this city to all parts of the world, through consular officers, commercial attachés, and agents, who perform their services for the Government of the United States, keeping the Departments of State and Commerce in constant touch with business conditions in foreign lands, favorable opportunities for the extension of American trade, and the manner of attaining the greatest success in competition with other countries.

The scope of the Special library of the Chamber of commerce of the United States of America covers as fully as available the most recent printed information issued by commercial and trades organizations in foreign countries. It endeavors to collect valuable material from the organizations throughout the United States which are devoted to better co-operation among business men and the several objects which promote the extension of commerce, manufacture, and credit at home and abroad. The library has at present a large file of reports, bulletins, by-laws, and such other printed and typewritten material as describes the varied activities of hundreds of organizations.

It is not the aim of this library to duplicate other collections of material to which the staff of the Chamber has access in Washington. The Congressional library has parliamentary publications and other public documents of foreign countries, and through its division of Legislative reference compiles a wide range of material. The library of the Department of commerce has official publications of statistics from all foreign countries in such a large series that duplication, even if desirable, would be physically impossible. In regard to mineral resources, the library of the Geological survey is open to the Chamber. In fact, the Chamber has access to specialized and comprehensive collections of books and pamphlets relating to practically every field of Government activity.

The present European crisis has called into use all the information possible to obtain in regard to foreign commerce, facilities for shipping, contraband articles, embargoes laid on articles formerly exported

by foreign countries, moratoria, war risk insurance, and situations in foreign markets from which the products and purchases of belligerent countries have been withdrawn. Many requests for specific assistance from merchants and manufacturers throughout the United States have come, and continue to come, to the Chamber, and through the means at hand, supplemented by the statistical and special collections of the libraries of Government departments, and by daily dispatches from consuls, obtained through the State department, detailed replies have been sent to all individuals and organizations that have relied upon the Chamber.

The Chamber has not waited for inquiries, but using its own information, collating official compilations of foreign governments, and getting current information from special reports of the consular service, has for three months been issuing a series of bulletins containing the most significant information about foreign markets which may now be open. When the series is completed there will be a bulletin on every country of commercial importance. Another series of bulletins describes foreign trade in particular kinds of goods.

Two lists have recently been compiled by the library, gathered from the latest reports obtained from foreign countries before the war began. One of these lists is composed of the names of organizations, together with names of officers, address, and a brief statement of purpose. Every organization in every foreign country from which a report could be obtained has been included in this list. Strong commercial organization which existed in the countries now at war accounts in a large way for the great success of their merchants in obtaining so large a part of the commerce of the world. There will be between two and three thousand organizations in this list when it is completed, some of which are the combined organizations of many unnamed societies for the promotion of special trades. The second list is composed of names, addresses, and purposes of certain foreign organizations which give particular attention to the development of foreign trade.

Streets: Their Arrangement, Lighting and Planning

Prepared by Theodora Kimball, Librarian, School of Landscape Architecture, Harvard University.

The following list comprises the sections relating to Streets from a "Classified selected list of references on city planning," in preparation by Theodora Kimball, Librarian of the School of landscape architecture at Harvard university. The entire list is planned according to the system of classification outlined in "City planning: a comprehensive analysis" by J. S. Pray and Theodora Kimball (Harvard university press, 1913). In the present list, the references are also arranged in classified sequence and the numbers at the end of each reference designate its exact classification in that system. The letter "L" immediately following indicates that the material may be found in the Library of the Harvard school of landscape architecture, and in cases where the material is not in that Library, "H" designates that it may be found elsewhere in the Harvard university libraries, and "B," in the Boston public library.

INDUSTRIAL ARTS INDEX

An analytical index to more than sixty periodicals and many departmental bulletins devoted to trades and manufactures, mining and metallurgy, lighting, heating, ventilating, etc.

This Index is to scientific and trade periodicals what the Readers' Guide to Periodical Literature is to periodicals of a general nature and it is published to meet the requirements of Special Libraries and all students wanting up-to-date information on subjects of a technical nature.

A recent number refers the reader to 11 articles on Coal Testing; 30 articles on Dies; 39 articles on Fire Protection; 63 articles on Scientific Management; etc., etc.

All articles of importance in a well selected list of periodicals are indexed under as many subject headings as the contents demand and much use is made of cross references to direct the searcher for information to all sources where material may be found.

Free sample copy and full information supplied on request.

THE H. W. WILSON COMPANY
WHITE PLAINS, NEW YORK

BOOKS of ALL KINDS

Dog Eared Pamphlets

are unknown when your limp covered publications are placed in our pamphlet binders. Used and recognized as standard by all prominent librarians. Free samples sent upon request.

GAYLORD BROS.
SYRACUSE, N. Y.

To Special Libraries Subscribers:

The Secretary is considering the advisability of having No. 1 of Vol. 1 of "Special Libraries" planographed, provided there were sufficient members who would find it worth while to purchase this for the completion of their sets. We can obtain fifty copies by this process. Will all members desiring a copy please notify the Secretary at once? If sufficient replies are received, copies will be made. Retail price 50 cents each.
